[After the command has been given to you whether lord or technician the first step is the same the newly released spirits go through the planes in the central universe these planes one through twelve were established especially for newly released spirits each spirit lord or technician goes to the first plane there he learns how the first plane operates and what is expected of a spirit on the first plane that is making mineral atoms the technicians assigned to this plane assist the newly released spirit to learn how to make these mineral atoms and modify his learning to the particular name he was given by the creator each of our names predetermines our abilities in certain aspects of experience and so as the newly released spirit progresses through the twelve planes at the central universe he is being made ready to experience either as a technician or as a lord spirit](#)

[As was mentioned before the technicians usually remain at the central universe while the lord type spirits are sent out into the creation once through the twelve planes the technician type spirits are assigned to a particular crystal there he starts making basic atoms just as the lord type spirit does on his planet of assignment the atoms being made by our newly released technicians are utilized by the technicians in that particular crystal they make and assemble their projects with these atoms once the new technician spirit has mastered the making of atoms he goes on to the fairy type of activity within this crystal he is now in charge of maintaining a form or a part of an object being put together by the technicians in the crystal next he goes on to the deva activity which means that he is now in charge of maintaining and energizing a whole project which could be most anything from a stone formation to a prototype of an animal body or a human body of course these are just general examples and if you are in fact a technician spirit you can integrate and see every detail of your activity within a crystal at the central universe the next step is quite interesting normally as a lord spirit the next step would be the man stage but here at the central universe instead of incarnating or projecting a body for the man stage the spirits indwell the form being made in their crystals and make them function and see how they could be improved from that point of view the angel aspect is also quite different and most interesting at this point the new technician assembles the parts together such as the stone formations or the parts of an animal or even a human body he checks out all the parts and their functions and then puts it through various exercises and tests and modifies it until he is satisfied that it is in good condition to be sent out into the creation the manu stage is next at this point the new technician studies the creator s plan and sees where his new project is to be](#)
